LO: To encourage young workers to stay in the countryside

Nature

Nature is important

Rural

Why you should stay in the COUNTRYSIDE

Why leave the countryside?

If you leave your own home will be abandoned. Who will look after the animals? Who will help and take care of the crops? What will you eat if nobody else chose to stay? Why would you want to live in a big house? It would be hard to find a job there. Life would be crowded. Have a peaceful life.

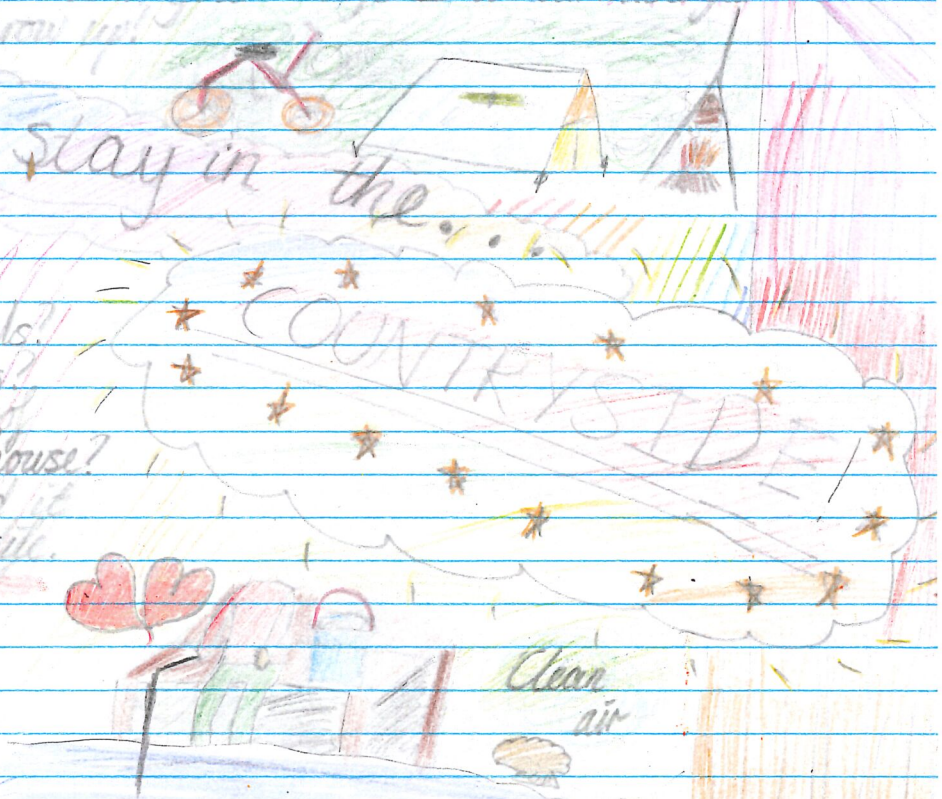
houses cramped

Compared to city houses are cheaper. It's really busy because of lots of people. If you leave the countryside will not survive? The houses are much more cheaper because of how people move to different places and that lost people live in countryside.

Animals food

Have you ever wondered where we get food from? It came from the hard work of us before farming. If you leave who will go all the farmers to help people have food to eat? Who will feed the animals?

Would you want to breathe in dirty polluted air? Live a natural life. Go on an adventure, explore the wild. Breathe the fresh air. Be shocked if you that you could get very ill if polluted air is in your lungs? It would make you throw up.



animals and crops healthy!
